

The Doorbell Rang Activity Card

Dear Families - Young children are beginning to understand that things can be divided so that everyone gets an equal share. The Doorbell Rang begins with a plate of 12 cookies that first must be divided in half, then in fourths, then in sixths, then in twelfths! Help your child cut the 12 cookies from the bottom of this page and paste them one at a time into the boxes so that Sam, Victoria, Tom, and Hannah each get an equal share. Then, count to see how many cookies each child got.

How many cookies did Hannah get?

How many cookies did Sam get?

How many cookies did Tom get?

How many cookies did Victoria get?
